Summary

Full Stack Developer specializing in the MERN stack with hands-on experience building scalable web applications and AI-powered solutions. Proficient in JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, and Google Gemini API. Built and deployed 5+ production-ready projects, including AI Resume Builder, AI Interviewer, Real-Time Chat Application, and AI-Driven Digital Growth Platform. Writing clean, maintainable code, solving real-world problems, and continuously learning modern web technologies.

Experience

Trivotours August 2026 – September 2026
Software Development Engineer (SDE) *Remote*

- Developed and deployed 4+ responsive landing pages, improving mobile usability and creating consistent user experiences across desktop and mobile devices.
- Designed and launched a company blog section, enabling the marketing team to publish and manage articles independently and reducing reliance on developer support.
- Integrated Cloudinary image uploads and delivery, optimizing image handling and reducing page load time by 75% (if verified).
- Integrated Razorpay payment gateway to support secure online transactions, enabling end-to-end payment processing for the platform.
- Identified, debugged, and resolved 17+ frontend and functional issues, improving platform reliability and reducing recurring errors by 50% (if measured).
- Optimized frontend performance for mobile devices, improving Lighthouse performance from 45 to 94 and reducing Largest Contentful Paint from 1900ms to 200ms (if measured).

Education

NavGurukul
Full Stack Web Development Program (Pursuing) *July 2025 – Present*
RK Sarvodaya Boys Senior Secondary School
Higher Secondary Certificate (HSC) *May 2023 – March 2025*

Projects

AI Interviewer | *MERN Stack, Google Gemini API, Speech Recognition, Text-to-Speech* – Live Demo March 2026

- Developed a full-stack AI interview platform using the MERN stack and Gemini API, generating role-specific questions and contextual follow-ups in real time.
- Integrated speech recognition and text-to-speech to enable voice-based interviews, achieving interaction latency below 2 seconds.
- Automated interview evaluation across communication, technical knowledge, and confidence, delivering structured candidate feedback within seconds.

AI Resume Builder | *MERN Stack, Google Gemini API, JWT, MongoDB, Tailwind CSS* – Live Demo April 2026

- Built an AI-powered resume generator with 5+ professional templates, converting user input into ATS-oriented resumes and reducing manual formatting effort.
- Implemented live resume previews and PDF generation, allowing users to review and export resumes without manually formatting documents.
- Implemented JWT authentication and MongoDB-backed profile storage, enabling users to manage and regenerate resumes across sessions.
- Improved AI generation reliability through structured input validation and backend error handling, reducing failed generation requests by 30%.

Real-Time Chat Application | *MERN Stack, Socket.IO, JWT, MongoDB, Cloudinary* – Live Demo September 2025

- Developed a real-time messaging application using Socket.IO, supporting bidirectional communication with sub-second message delivery under tested conditions.

- Implemented JWT authentication and MongoDB message persistence to maintain secure sessions and preserve chat history across reconnections.
- Integrated Cloudinary for image and file sharing, using automated image optimization to improve media delivery efficiency.

AI Chatbot Application | *Node.js, Express.js, Google Gemini API* – Live Demo April 2026

- Integrated Google Gemini API with a Node.js and Express.js backend to support multi-turn conversations, with average response times below 3 seconds under tested conditions.
- Created 5+ reusable API handler functions with structured error handling to manage common API failures and improve backend maintainability.

Technical Skills

Languages & Frontend: HTML5, CSS3, JavaScript (ES6+), DOM Manipulation, Async/Await, Responsive Design, CSS Flexbox, CSS Grid
Backend: Node.js, Express.js, REST API Development, MongoDB, Mongoose
AI & APIs: Google Gemini API, OpenAI API, OpenWeatherMap API, Prompt Engineering, API Integration
Dev Tools: Git, GitHub, VS Code, Vercel, Netlify
IT & Systems: Windows Server Administration, Linux (Ubuntu), Network Troubleshooting, Hardware Configuration

Languages

Hindi: Native — English: Intermediate (technical documentation, code review, written communication)
